## About This Game

### Finally, a starship combat game worthy of the name Star Trek.

Star Trek: Starfleet Command puts you in the captain's chair for an amazing real-time space combat experience.

Pledge your allegiance to the United Federation of Planets, the Klingon Empire, the Romulan Star Empire, the Hydran Kingdom, the Gorn Confederation or the Lyran Star Empire.

Every good tactician knows there's a fine balance between speed and raw power. Choose from four classes of ships and over 50 3-D rendered hull designs.

Experience a 30-year campaign that takes you from Lieutenant Commander of a Frigate to a Rear Admiral in control of a task force including Destroyers, Heavy Cruisers and Dreadnoughts.

---

Multi-function display panels offer instant access to critical systems: Sensors, Weapons, Shields, Transporters, Marines, Mines, Engineering, Science and Energy Management.

Challenge yourself with dozens of unique missions created by the Dynaverse engine or re-enact classic scenarios from the Original Series.

Numerous multi-player options include "Pass the Tribble" and cooperative Starbase Assault with up to six players. Or go head-to-head over various network connections.

Dosen't work on win 10. This is a blast from the past! I really enjoyed it years and years ago, and am enjoying it now. in HD, nice graphics and ....

I AM PLAYING ON WINDOWS 10 with NO Problems (I followed the Win 10 guide)

Its a real gameplay over Graphics winner. The graphics are poor (20 yrs old) but with the mods they are much, much better. But forget that because the the game play is superb. Its challenging and fun.

Great Tutorials and the manual is great too!

.... found in \\Steam\\steamapps\\common\\Star Trek Starfleet Command Gold Edition\\Manuals

there's an HD mod too

[Back in 1999 it even sold more than the previous years Interplay Blockbuster Baldur's Gate.](#)

[With a couple of mods installed this looks pretty good. plays smoothly at 1920X1080 and even with the SFC launcher downloaded from Hot and Spicy will play Multiplayer.](#)

Really what are you waiting for ..... Works flawlessly on Xubuntu 18.04 AND the HDWidescreen patch from Hot n Spicy works as well. This is a very well done port to computer of the board game StarFleet Battles. If your looking for the Starfleet Battles board game on your computer, you will not be dissapointed. I bought this game new 20ish+ years ago and still play it, although i will say the best of the series is SFC2OP. Big thumbs up from me and happy to see this great old game on STEAM. If you are looking for something more arcade like it may not be for you.....and I am still looking for better ship models similar to Firesouls OP+ mod for SFC2OP. I might even be able to import those models into SFC1....we shall see :-D <("). Dosen't work on win 10
